Overview

SCREAM can also be divided into the possibly more known communication and MEL (Monitoring, Evaluation and Learning) definitions. We believe, that through developing our SCREAM capacities further, we not only improve our communication internally but also externally while expanding our reach to stakeholders all around the world. Monitoring as well as Evaluation of learning and set aims and objectives, is a vital part of project management which is often forgotten while running projects. Therefore, we want to focus on understanding the project cycle and developing participative and accessible SCREAM methods while simulating a complete project.

Additionally, to the SCREAM project, we will hold an **EFN meeting 29-30 October 2022**.

Creating knowledge and tools for reaching out, monitoring, evaluating and sharing.
